THE SUBMICROSCOPIC STRUCTURE OF SEVERAL
COMPLEX GLASSES (Submikroskopische Struktur:
einiger Komplexer Gläser). [1962] [33]p. (foreign
text included) 56 refs.

Order from SLA \$3.60

62-18131

Trans. of Glastechnische Berichte (West Germany)
1959, v. 32, no. 11, p. 450-459.

DESCRIPTORS: *Glass, Microstructure, *Porous glass,
Heat treatment, Particles, Light, Reflection, Sodium
compounds, Boron compounds, Silicates, Microanalysis.

A long discussion between the representatives of the
"Crystallite" theory and those of the "network" theory
led to the concept of the "Polymeric Crystallite" struc-
ture of single component glasses. The problem of the
physical order in single component glasses was replaced
by the problem of the chemical order in complex glasses.
